Part 12

Part 16

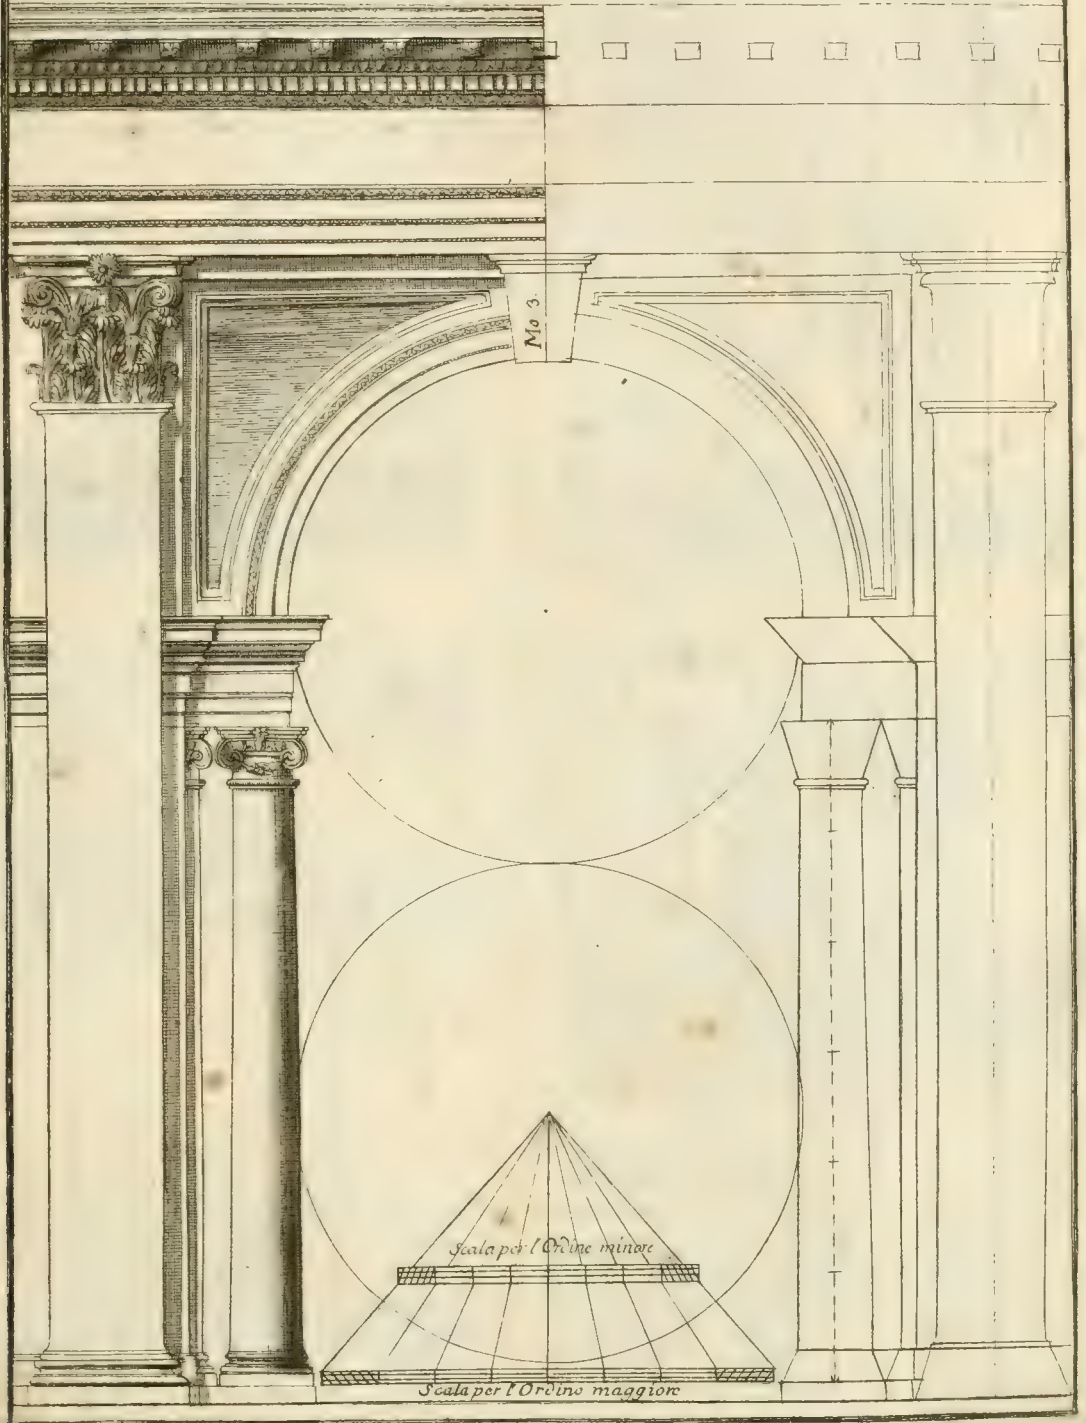

Part 12

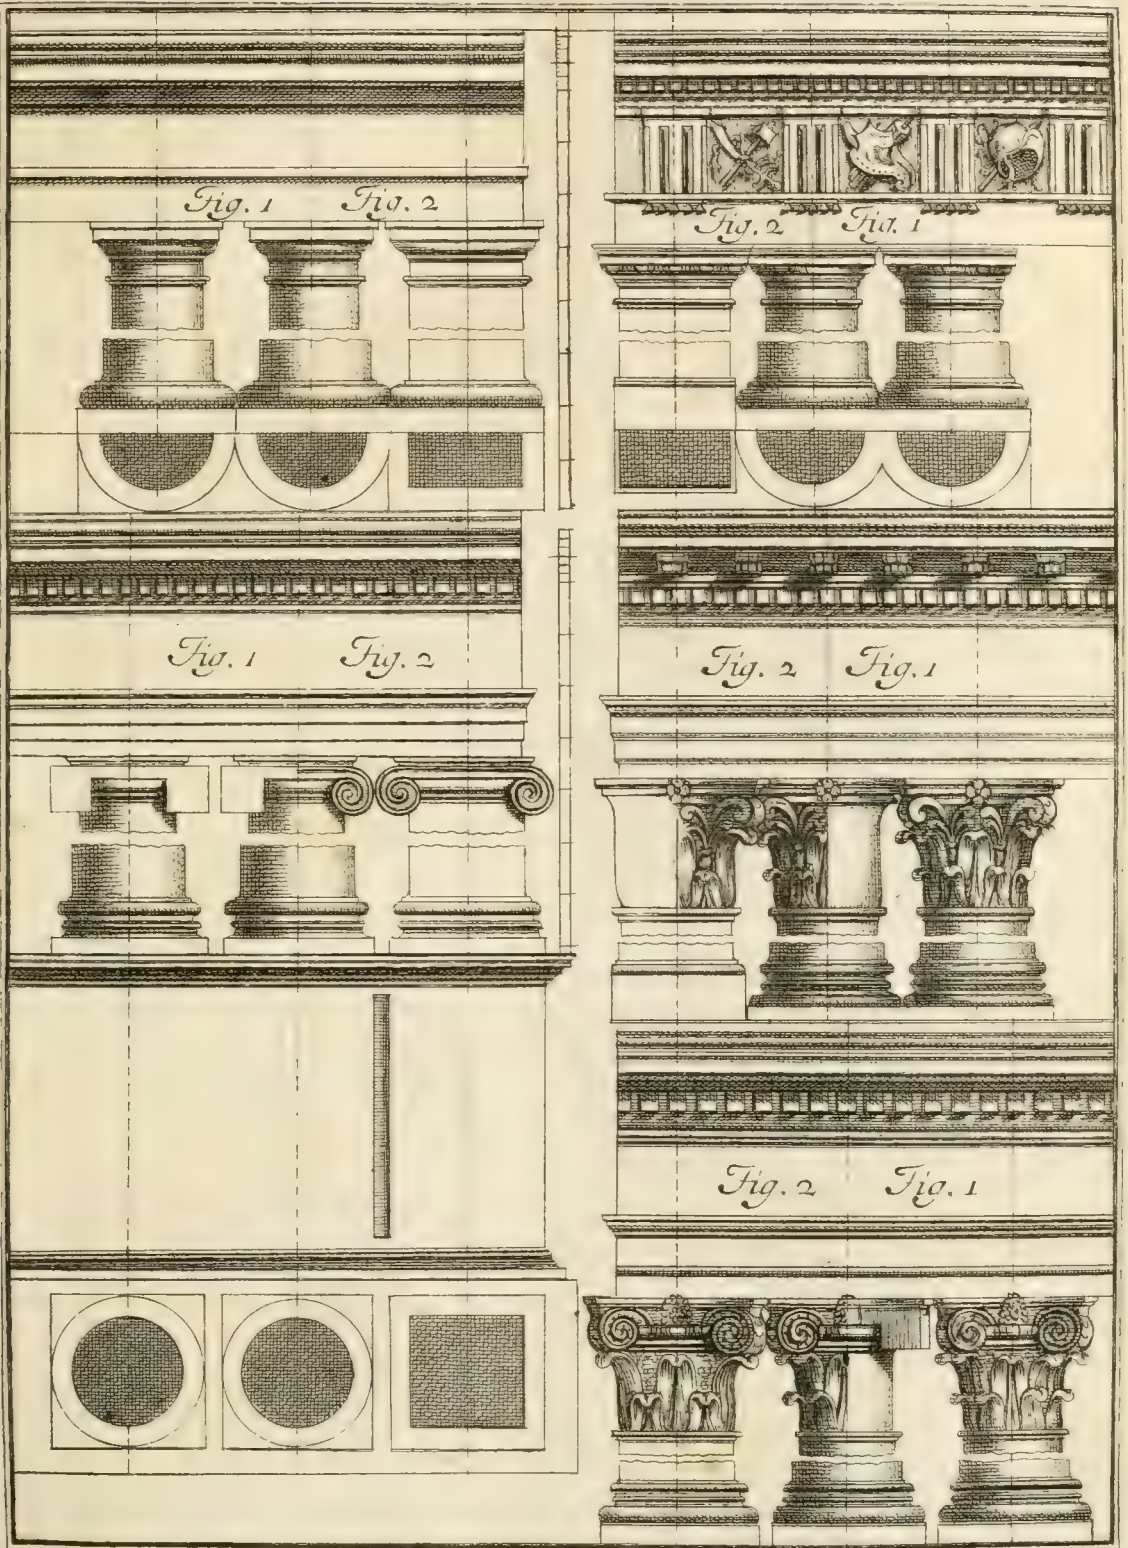

Per avere speditamente la Parabola, nella Figura 3, come sarebbe AL, si ritrovino li Fochi dell' Ellisse, PQ. Indi al Punto dato A, si tirino li raggi rettili PA, QA, e si prolunghino, se si vuole, dalla parte esterna. Dividigli l'angolo PAQ, e se si vuole l'angolo PQR, in due parti eguali, allora dal Punto A e per il mezzo de' detti Angoli condursi la retta NAL, che sarà la Parabola, e perpendicolare alla Tangente, che verrebbe tirata dal punto A.

Per tirare speditamente dal punto A (Fig. 3) una Tangente, si trovino li Fochi P, Q della Ellisse, tirando li raggi rettili PA, QA al punto dato A. Si prolunghi uno d'essi, come sarebbe QAR. Ora dividasi l'Angolo RAP in due parti eguali, indi dal Punto A, al mezzo di detto angolo QAR, tirasi la Tangente.
